Camargo's Ruth E. Stevens Leads Open Forum at AAPS Annual Meeting

(Cincinnati, OH; November 22, 2010) – [Camargo Pharmaceutical Services](#), a full-service clinical research organization (CRO) specializing in end-to-end drug development through the [505\(b\)\(2\) process](#), exhibited at the 2010 American Association of Pharmaceutical Scientists (AAPS) Annual Meeting, which took place in New Orleans, Louisiana, November 14-18. Camargo Executive Vice President and Chief Scientific Officer [Ruth E. Stevens](#), Ph.D., MBA, was selected to participate in a regulatory open forum where she presented on the topic, "Enhancing the Development Pipeline: Strategies for Repurposing, Fixed-Dose Combinations, 505(b)(2) Filings and Patent Protection."

Dr. Stevens presented the current regulatory requirements, as well as the clinical, nonclinical and [CMC](#) expectations. She discussed many significant changes the pharma industry has undergone in response to the looming patent cliff of several blockbuster drugs and fierce generic competition. These changes have caused an increased emphasis on life cycle management, focusing on saving development costs and increasing revenue from current drugs on the market. Dr. Stevens covered strategies from the discovery perspective, such as repurposing an approved drug and development candidate selection for future fixed-dose combinations, stating such candidates may be suitable for the 505(b)(2) approach for regulatory filing. Dr. Stevens presented alongside other companies and the open forum concluded with a panel discussion for participants to ask questions.

"I was extremely honored when approached by AAPS to present at the Annual Meeting," stated Dr. Stevens. "This is a strong meeting for the pharmaceutical industry and it is a compliment to have Camargo recognized for its research and expertise within the 505(b)(2) regulatory arena."
